

The Political Economy of Hunger: Volume 3: Endemic Hunger, 1991, 412 pages, Jean DrĚze, Amartya Sen, 0198286376, 9780198286370, Clarendon Press, 1991

WIDER The World Institute for Development Economics Research, established in 1984, started work in Helsinki in 1985, with the financial support of the Government of Finland. The principal purpose of the Institute is to help identify and meet the need for policy-oriented socio-economic research on pressing global and development problems and their inter-relationships. WIDER's research projects are grouped into three main themes: hunger and poverty; money, finance, and trade; and development and technological transformation. Volume III deals with the strategic options for the elimination of endemic hunger. The topics covered include: the comparative extent of hunger and deprivation in different parts of the world; the influence of food production; the interconnections between economic growth and public support; the role of economic diversification in reducing vulnerability; the potential impact of direct public provisioning on living standards; and the politics of public action. In addition to general analyses, the book examines the international relevance of a number of specific country experiences in Asia, Africa, and Latin America (including those of China, India, Sri Lanka, Brazil, Kenya, Bangladesh, and Nigeria).
